No worse off principle

For participant contributions, a no worse off principle applies for grandfathered HCP recipients who, on 12 September 2024, were either receiving a Home Care Package, on the National Priority System, or assessed as eligible for a package.

These participants will make the same contributions, or lower, than they would have had under HCP program arrangements, even if they are re-assessed into a higher Support at Home classification at a later date.
